

BESANÇON - ASTRONOMICAL CLOCK OF THE CATHEDRAL

A masterpiece of watchmaking in the 19th century.

Built between 1858 and 1860 by Auguste Lucien Vérité, the astronomical clock has a precise and complex mechanism consisting of over 30,000 parts and 11 movements. Worked by weights, some operate chimes and automata. The 57 faces provide a lot of information: calendars, the tides in 8 ports, eclipses... Visitors can look all around the clock and see its interior mechanisms.

RECEPTION

Subject to modification.

Open

From 9.50 a.m. to 12.30 p.m. and from 1.50 p.m. to 5 p.m.
